

- **Purpose of the Platform**

The platform is designed to enable respectful and meaningful conversations between individuals who hold different opinions on social and political issues. By participating, you contribute to a structured discussion environment where understanding, openness, and mutual respect are encouraged.

- **What Participation Involves**

As a participant, you will take part in a video-based dialogue divided into 3 five minutes sections. In each section, both you and your conversation partner aim to understand each other's viewpoint as accurately as possible. Your task is not to persuade but to listen, exchange perspectives, and follow the provided discussion prompts.

- **Data We Collect**

To operate the platform, we collect limited information: your email for communication, your username (which is visible to your partner), your encrypted password, your questionnaire answers, your chosen discussion topic, and your selected time slots. This data is necessary for matching, scheduling, and ensuring the platform works correctly.

- **Use of Your Information**

Your data is used solely to match you with a suitable conversation partner, set up the interaction process, and improve user experience. Questionnaire responses may be analyzed in anonymized and aggregated form to enhance the platform, but no identifiable information is ever shared.

- **Privacy and Confidentiality**

All personal data is handled confidentially and securely. Only your username is visible to your partner. The video calls are not recorded or stored. Questionnaire, demographic, and interaction data are processed without linking them to your real identity.

- **Voluntary Participation**

Participation in the platform is voluntary. You may decide not to participate or to stop using the platform at any time without any negative consequences.

- **Your Responsibilities**

By registering, you agree to treat your conversation partner respectfully, follow the dialogue rules, not record the video calls, and provide truthful information in registration and questionnaire forms.

- **Your Rights**

You have the right to request access to your stored data, ask for corrections, or request deletion of your account. You may also contact us with any concerns regarding privacy or data usage.

- **Contact Information**

For questions, concerns, or data-related requests, please contact the ToTo Team at
